

SETTING UP THE APPLICATION ENVIRONMENT

Create Flask Project

Date	09 November 2022
Team ID	PNT2022TMID32879
Project Name	Personal Expense Tracker Application

Code:

App.py:

The screenshot displays the Visual Studio Code interface with a Python Flask application file named `app.py` open. The code defines a simple web application with a single route `/` that returns `<h1>HELLO WORLD</h1>`. The application is run in debug mode. The terminal at the bottom shows the command `python -m flask run` being executed, resulting in a warning about using a development server and the application running on `http://127.0.0.1:5000`.

```
app.py
1 from flask import Flask
2 app=Flask(__name__)
3 @app.route('/')
4 def index():
5     return '<h1>HELLO WORLD</h1>'
6 if __name__ == '__main__':
7     app.run(debug=True)
```

```
PS D:\ibm\cloud\Flask project> python -m flask run
* Debug mode: off
WARNING: This is a development server. Do not use it in a production deployment. Use a production WSGI server instead.
* Running on http://127.0.0.1:5000
Press CTRL+C to quit
```

Output:
